

CDR-E07 & Wi-Fi Dongle Un-boxing

* Wi-Fi dongle is to be ordered separately,

Parts Assembled

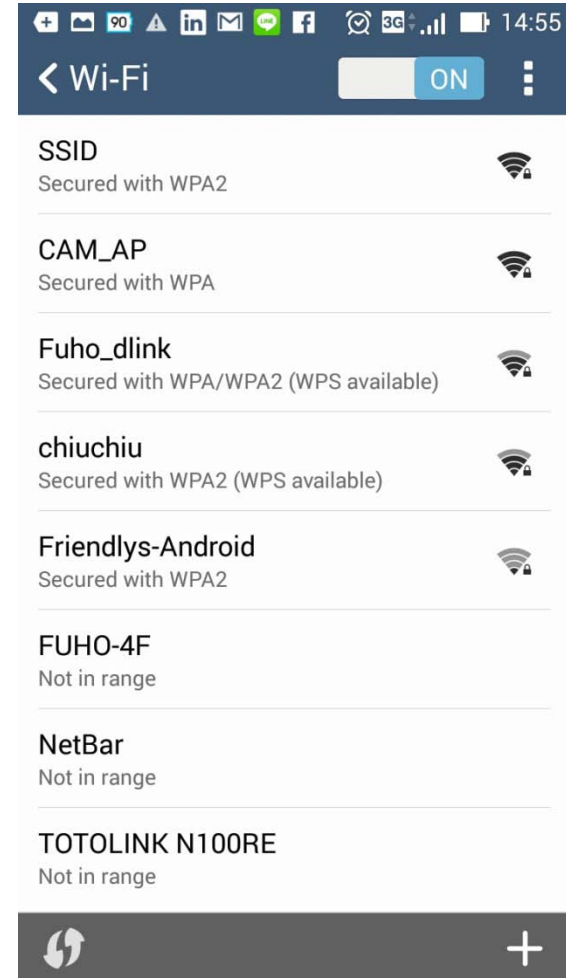

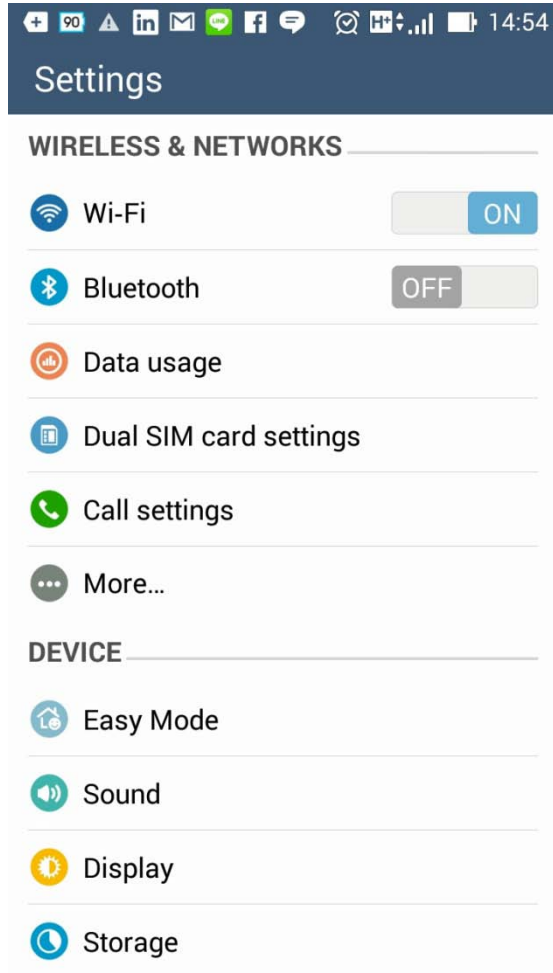

Power-up

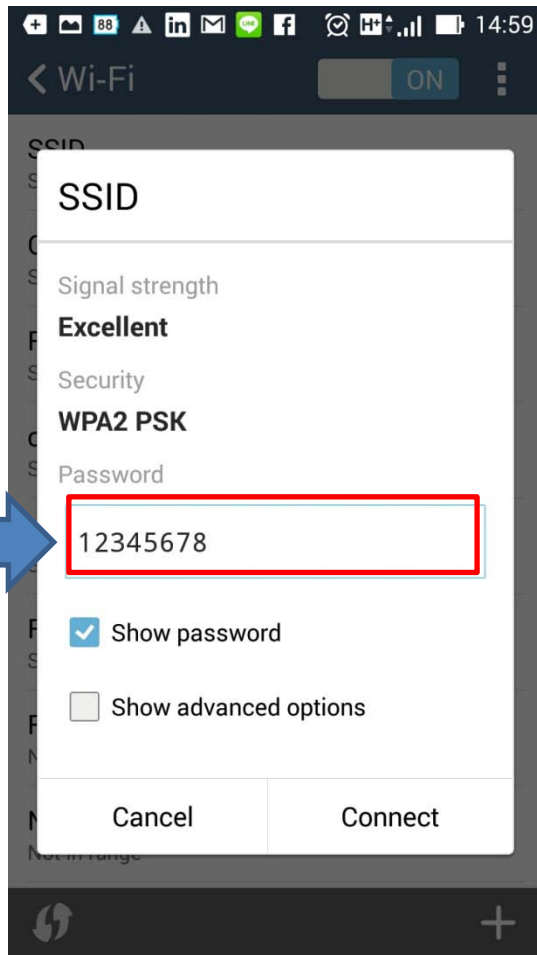

Blue light
should
blink

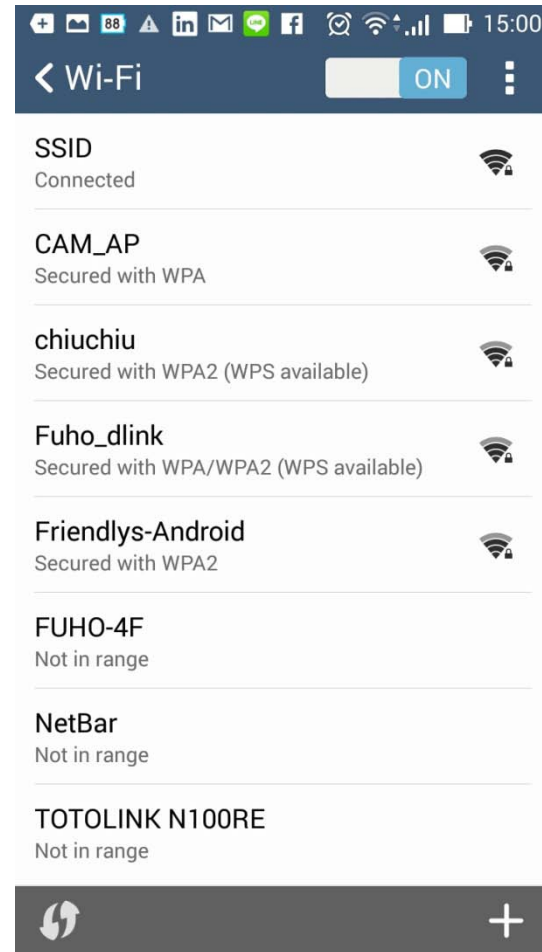

Enable Wi-Fi Connection On Mobile Phone & Look For “SSID”

Type In Password as Below, Launch “Vacronplayer” Once Connected.

Default settings should not be changed

* Download link: [Google Player](#), ios version launching soon

In Device List, Choose “Add” to add device information.

The image shows a mobile application interface. On the left, the 'Device List' tab is selected, and the 'Add' button is visible. A blue arrow points from the 'Add' button to the 'Edit' screen on the right. The 'Edit' screen is titled 'Edit' and shows a 'WiFi' device configuration. The fields are:

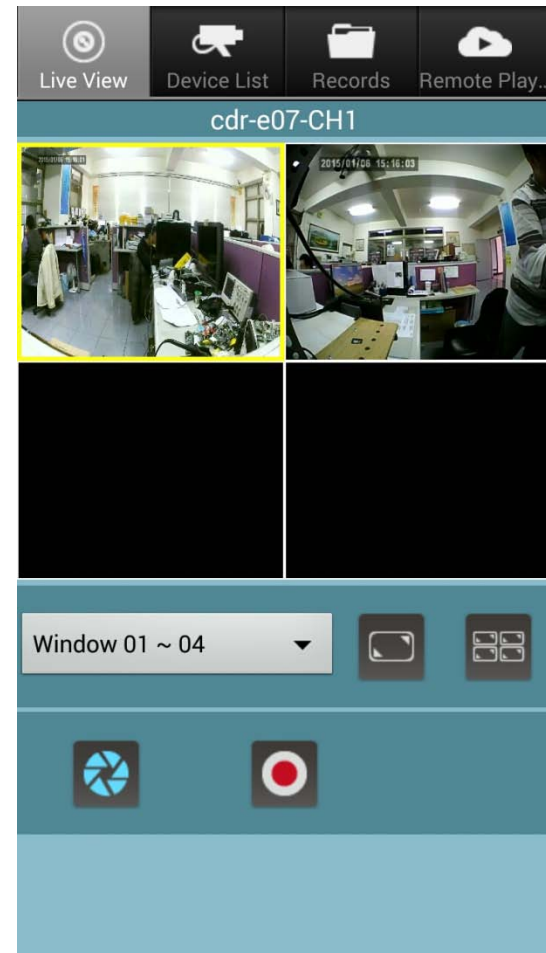

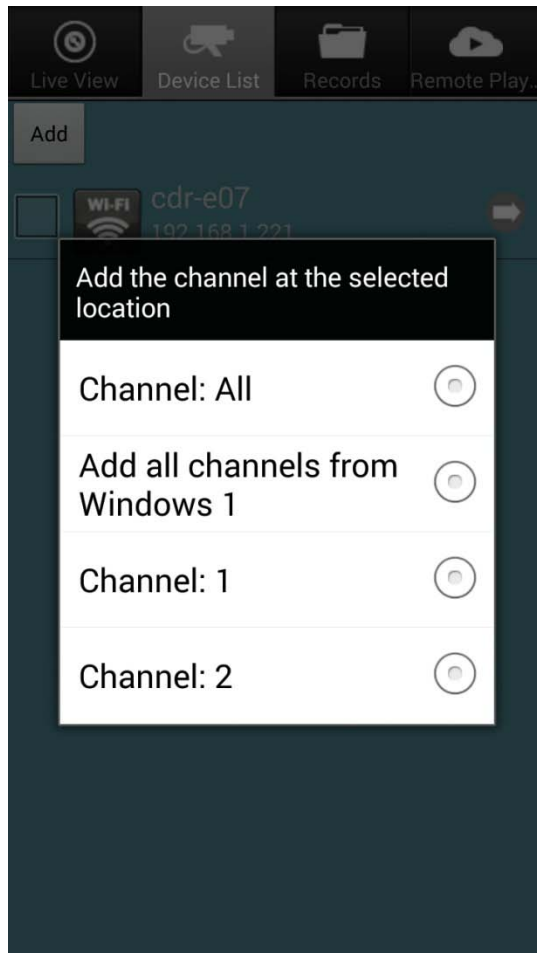

- Host Name: cdr-e07
- Host Addr.: 192.168.16.1
- Media Port: 5566
- Account: admin
- Password:
- Channel: 2

Annotations on the right side of the 'Edit' screen:

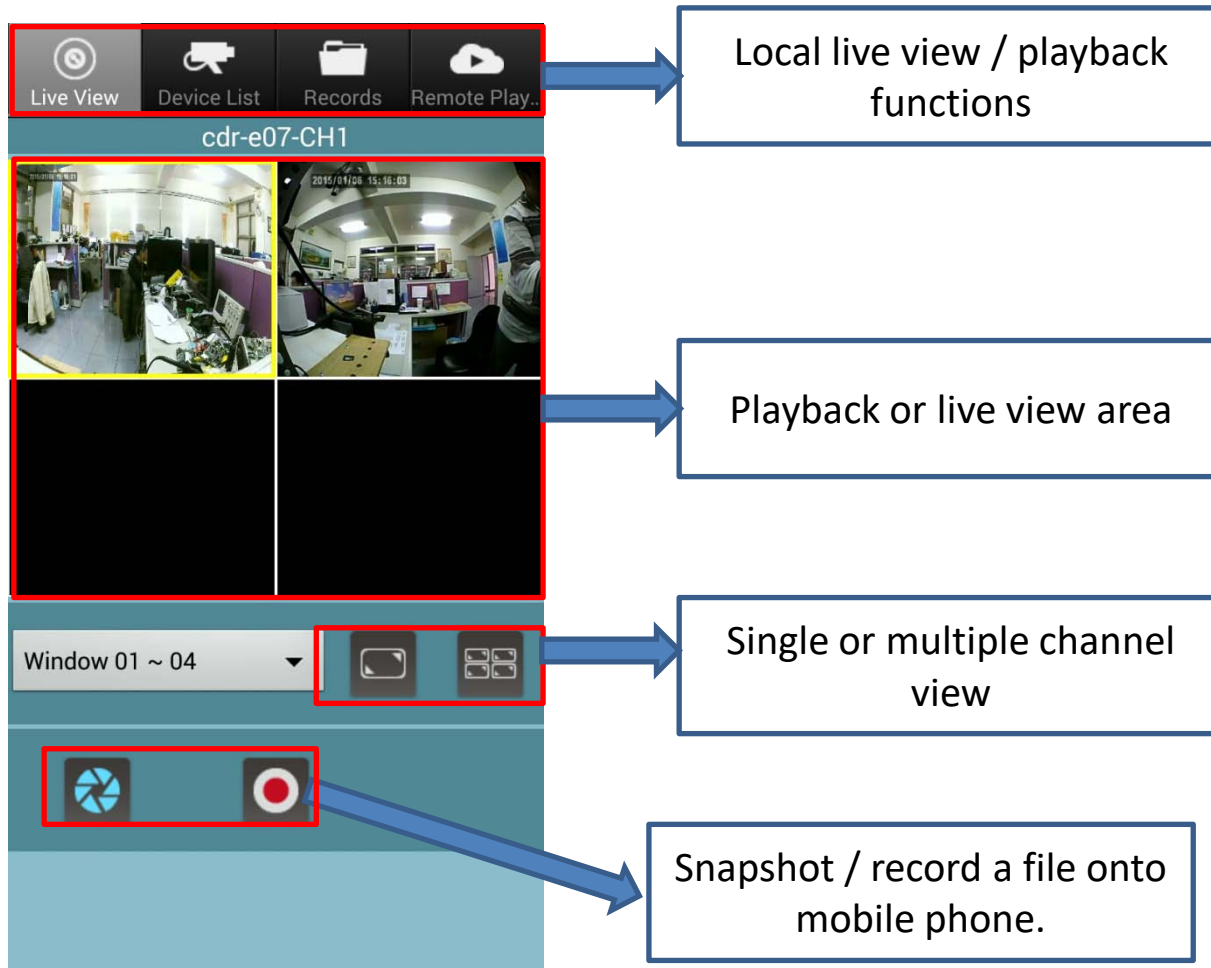

- A blue arrow points from the 'Host Addr.' field to a box containing the text 'Obtained automatically'.
- A blue arrow points from the 'Media Port', 'Account', 'Password', and 'Channel' fields to a box containing the text 'Default settings should not be changed'.

* Once all information has been set, press “return” button on mobile phone to go back to “device list”

Select The Device From The List, And Choose Add All Channels When Prompted
